Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicants' arguments and amendments, filed December 4, 2009, have been fully considered and they are deemed to be persuasive in-part. The following rejections are reiterated. They constitute the complete set presently being applied to the instant application.

Status of the Claims

Claims 1-7 and 9-14 are under examination.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-7 and 9-14 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The instant claims are drawn to a method screening a mammogram. However, as the method does not recite a physical transformation of matter, the method must be tied to a machine to be patentable subject matter (For further explanation see, *In Re Bilski* (No. 2007-10030, decided 10/30/2008)). In the instant case, the claimed method steps are not tied to a machine, and thus are non-statutory.

Response to Arguments

4. Applicants have responded to this rejection by stating that limitation of producing an electronic output image is a physical transformation of matter. The Examiner disagrees. The output generated in the method is display of data derived from a mammogram. The output is not the result of transforming one type of matter into another type of matter. Since the claimed method generates more data but does not physically transform matter, the instant claims do not have a physical transformation of matter. Furthermore, the instant claims are not tied to a particular machine. Thus, the claimed method remains non-statutory.

This rejection is maintained from the previous office action.

Withdrawn Rejections

5. Applicant's arguments and amendments, filed February 4, 2009, with respect to the rejections made under 35 U.S.C. §103 have been fully considered and are persuasive. Giger et al., Huo et al., and Wang do not teach the method of screening an asymptomatic patient's mammogram to detect abnormalities is performed before classifying the abnormalities. These rejections are withdrawn.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
